

WHY DNA-CENTRE IS THE RIGHT TOOL FOR YOUR BUSINESS

THE NETWORK IS OPEN FOR BUSINESS

Network self-improvement

Assure network performance with 360-degree contextual insights across wired and wireless. With DNA Assurance, your network learns, adapts, and troubleshoots problems before they happen.

On track automation

Simplify network management by automatically applying the right policy in the right place, all through a centralised dashboard. Now you can deploy networks in minutes with policy-driven provisioning and guided remediation.

Open APIs = infinite possibilities

Utilise an open, extendible platform to customise your network, allowing you to build any application you need for your business. Keeping your network flexible.

Shine a light on security

Take advantage of advanced threat detection through scalable visibility and security analytics. Plus, DNA-C integrates with other Cisco security platforms to offer end to end network monitoring.

Accelerate transformation

Make managing upgrades and implementing new technologies easier by working with a managed services provider like Natilik. The experts can guide you through every step of your networking transformation journey.

DNA Centre is the key to an intent-based network.
