INTELLIGENT DEVICES  
FOR MS TEAMS

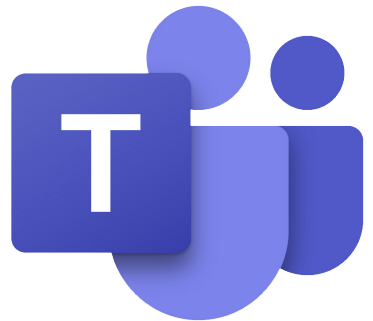

# INTRODUCTION

No longer is it necessary to compromise the quality of experience on video calls for your chosen collaboration software. With Cisco Video Device Support for Microsoft Teams it is now possible to use Cisco's enterprise grade, industry leading room devices with your existing Microsoft Teams deployment.

Never has it been more important to connect remote teams together and provide the tools to ensure stable, secure collaboration regardless of where people are located allowing them to execute their roles efficiently and effectively.

With Cisco Video Device Support for Microsoft Teams, meeting rooms can be quickly transformed into next generation collaboration spaces to take your teams performance to the next level.

## KEY FEATURES

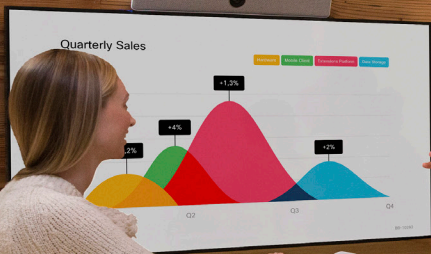

### INTEGRATED ATTENDANCE LIST

Meeting attendance lists display everyone in the meeting, allowing users to quickly and easily see who they are meeting with.

### DUAL SCREEN CAPABILITIES

Use dual screens to immerse in-room attendees to see shared content, whilst still maintaining focus on the team and the speaker.

## INTELLIGENT VIEWS

With Intelligent Views, Cisco Video Devices ensure that whoever is speaking is always in frame, regardless of where they are sitting.

## ONE BUTTON TO LAUNCH MEETINGS

Join Microsoft Teams meetings with just the click of a button. The integrated display shows details of upcoming meetings that can be started by simply pressing the "Join" button.

## VOICE ASSISTANT

Use WebEx Assistant voice intelligence to join meetings without touching a thing. "OK WebEx, join the meeting", starts your scheduled meeting and get you collaborating with your teams right away.

## CONTENT SHARING

Quickly and easily share content in your Microsoft Teams meetings. Remote attendees can share content using their Microsoft Teams client, this content will be displayed on-screen on Cisco Video Devices alongside video streams of the meeting attendees. Alternatively, in-room attendees can simply share direct from the Cisco Video Device to share content with all attendees of the Microsoft Teams meeting.

# VIDEO DEVICES

Cisco and Natilik have a collaboration device for every space. With billions of dollars being spent on research and development every year, you can be assured these devices really are best in class and your future investment in Cisco technology is well protected. Whether you are looking for personal devices, something to kit out your huddle spaces, or a fully integrated board room immersive solution, you can be assured that Cisco video devices will provide a secure, consistent, easy to use, high quality collaboration experience.

# DIGITAL SIGNAGE

Capitalise on your investment and use meeting rooms to broadcast key information across your business when meeting devices are not in use. Key content ranging from key business KPIs and training videos through to the weather and real-time travel information, this is an innovative way Natilik can help you get more from your investment in technology.

# USER ADOPTION

Deploying technology to enable better collaboration is only part of the journey. To fully realise the benefits of the connected workforce it's essential to make sure that everyone understands how to get the best from the tools they are using. The Natilik team's experience working with an assortment of clients on collaboration transformation projects means they can help ensure you get the best from these technologies. The team will work with you to understand important topics like end user psychology, training methodologies and technology adoption profiles to ensure your users are prepared and ready to collaborate effectively.

# FLEXIBLE FINANCE

Natilik can offer you a multitude of finance packages on Cisco Video devices ranging from capital finance agreements through to device rental options that align with ROI models. Natilik has a number of solutions to meet the objectives of your business.

# WHAT NEXT?

To arrange a technology demonstration or to discuss further how Cisco video devices can be used by your organisation with Microsoft Teams then please contact your account manager or alternatively email us at [hello@natilik.com](mailto:hello@natilik.com)
