

5 BUSINESS BENEFITS OF UTILISING AN INTENT-BASED NETWORK

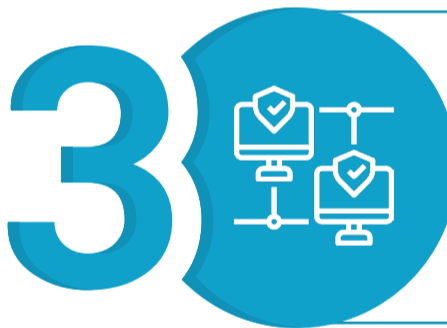

SIMPLIFY OPERATIONS

Centralise network policy control, automate management, and integrate IT workflows so you can respond to the needs of the business faster.

REDUCE RISKS

Use network monitoring and analytics, aided by machine learning, to pinpoint, report, and remedy issues before they become problems.

SECURITY THROUGHOUT

Detect and contain threats anywhere and everywhere, in real time. Use network intelligence to quickly alert and react to any threats.

INVEST IN INNOVATION

Deliver IT and business innovation now and in the future as your network is able to adapt to new applications and service requirements.

SATISFY CUSTOMERS

Consistently apply SLAs across the whole network to ensure that each customer has the same experience, improving overall customer satisfaction.
