

THE ART OF THE POSSIBLE

EXECUTIVE BRIEFING CENTRE

WE STRONGLY BELIEVE THAT SEEING, IS BELIEVING.
EXPERIENCING FIRST HAND THE CAPABILITIES OF EACH
SOLUTION AND HOW THESE INTEGRATE TOGETHER
TO DELIVER TRANSFORMATIONAL CHANGE.

Brochures and slides can only go so far in setting the scene; it is by touching each of the elements of technology that you are able to visualise what can be done and only by seeing these elements working together can you experience the true extent of what is possible.

This is why Natilik continues to work closely with Cisco and our Eco-System Partners to create an exceptional Executive Briefing Centre in our London City Office. This Showcase combines the capabilities of collaboration, networking, security and data centre technologies to enable our clients to fully appreciate ‘the art of the possible’ and what these solutions can deliver for their business.

WHAT YOU WILL SEE

OUR SHOWCASE IS NOT BUILT ON CONCEPTUAL DEMONSTRATIONS, BUT THE LATEST OPERATIONAL VERSION OF EACH TECHNOLOGY TO SHOW THE FULL EXTENT OF WHAT IS POSSIBLE.

COLLABORATION – see how voice, video and conferencing seamlessly merge to provide a truly collaborative environment across any device and any location. Experience TelePresence with SpeakerTrack, PresenterTrack and Proximity. See how Cisco's latest acquisition Acano simplifies Microsoft Integration and try Cisco's next generation collaboration platform Spark.

CONTACT CENTRE – discover how you transform customer interactions with an integrated omni-channel Cisco Contact Centre. See how agents are empowered through Cisco Finesse, the customer experience enhanced with Context Services, Analytics & WFO.

NETWORKING – at the heart of our showcase is Cisco Enterprise Networking alongside Cisco Meraki. You will be able to explore the simplicity of the Cloud Managed Network and the latest advancements in Software Defined Networking with APIC EM and iWAN.

SECURITY – see how combining technologies provide a comprehensive threat defence. In our showcase you will see Cisco Content security including OpenDNS integration working with the latest Next Generation Firewall and Meraki Unified Threat Management.

DATA CENTRE – our EBC environment is built on Cisco UCS, Nexus and EMC Storage. You will be able to see how the management of this environment is simplified with UCS Director and how with cisco technology we can extend your network in public clouds such as AWS and Azure.

WHO SHOULD ATTEND

We encourage all of our clients to visit our EBC every six months as a way of keeping up-to-date with the solutions that are available and to visualise how these can be used within their organisations.

For the technologist it provides a fast-track to understanding what each technology can deliver and how these combine to provide new capabilities to the business and different ways of delivering, securing and managing IT services.

For operational leaders and end-users it provides a way to visualise what is possible and what can be delivered by IT to transform the business and the way people work.

At the end of your visit to the Natilik Executive Briefing Centre we are convinced you will leave having seen something you have not seen before and with a much greater understanding of what is possible and how the technologies can combine to deliver real business value.

BOOK YOUR VISIT

To find out more about the Natilik Executive Briefing Centre and to book your showcase, please contact your Natilik Account Manager or contact the Natilik team on +44 203 597 8000.
