MERAKI SERVICES

CISCO MERAKI OFFERS A WIDE PORTFOLIO OF CLOUD MANAGED SOLUTIONS INCLUDING SWITCHING, WIRELESS, SECURITY AND DEVICE MANAGEMENT. NATILIK CAN ASSIST CLIENTS TO SUCCESSFULLY MIGRATE TO THESE MERAKI BASED SOLUTIONS.

As a Meraki Managed Service Partner, Natilik is ideally placed to advise and assist clients in the deployment of Meraki based solutions. Whether you are looking to replace existing technology or to complement existing infrastructure with Meraki components, we can help guide you through the design, transition and manage process.

Our Meraki Services span the full lifecycle of product deployment and can be tailored to your specific needs. These services are available globally and supported through our centres of excellence in New York, London and Sydney.

ASSESSMENT DELIVERABLES

NATILIK CAN PROVIDE A COMPLETE RANGE OF SERVICES TO ASSIST IN THE TRANSITION TO A MERAKI BASED INFRASTRUCTURE. THESE INCLUDE:

DESIGN - We assist you in defining your requirements and designing your Meraki based environment, services include:

- Wireless Site Survey and/or Assessment
- Assessment of Resilience and Redundancy
- Assessment of Security Requirements, Access Control and VPN
- Analyse and Plan Integration to on-premise Infrastructure
- Scoping and Provision of WAN / DIA Connectivity
- Network Design, Build Design and Schematics

TRANSITION - We assist you with the implementation and transition to your Meraki infrastructure with services that include:

- Build Configuration Templates
- Develop Test Plans
- Detail and Support Transition from on-premise solutions
- Support Integration to existing on-premise solutions
- Guest portal splash page customisation
- Go-Live support including Monitoring and Configuration changes
- Post-install Wireless Site Survey to ensure agreed Coverage

MANAGE POST DEPLOYMENT - Services to close off the transition phase, deliver ongoing support and analysis include:

- Post Deployment Documentation and Handover to Support
- Post Deployment Planning / Advice on Decommissioning Obsolete Infrastructure
- LAN Analysis of Traffic Flow and Configuration Recommendations
- Wireless Site Surveys to Review and Analyse Performance
- Security Rule-base Review and provide Recommendations

THE VALUE OF THIS SERVICE

By leveraging the experience of the Natilik team you will ensure that you deploy a Meraki solution that is aligned to your requirements and delivers the desired outcomes for your business, IT and end-users.

By taking the time to assess your environment needs in terms of Wireless, WAN and Security as part of the design stage ensures that a Meraki solution is created that fully matches requirements and performs as required.

Our expertise in Meraki as well as the wider Cisco Networking, Collaboration and Security architectures ensures we are able to transition you to a solution that integrates into your existing environment and minimises the risk of disruption.

Through our proactive managed services we are able to assist in the ongoing support and management of your Meraki environment, continually optimising it to your needs.

INTERESTED IN LEARNING MORE
